Skills

- **Languages**: C++, JavaScript, Java, C, Python
- **Frameworks**: HTML and CSS
- **Tools/Platforms**: MySQL
- **Soft Skills**: Problem-Solving, Team Player, Project Planning & Execution, Adaptability

Work Experience

Fiveral Private Limited Nov '25 – Dec '25
Virtual Assistant (Freelancer)

- Performed SEO optimization, including keyword research, on-page improvements, and competitor analysis using **Google Keyword Planner, Ahrefs, and SEMrush** to boost website rankings.
- Handled AEO (Answer Engine Optimization) by creating structured, search-friendly content aligned with voice search and AI-driven results, leveraging **schema markup tools and Google Search Console**.
- Conducted GEO (Geographical SEO) enhancements such as local keyword targeting, location-based content, and map listing optimization using **Google Business Profile and local SEO tools** to improve regional visibility.
- Monitored website performance and generated data-driven insights using **Google Analytics and Google Search Console** to track traffic, rankings, and optimization impact.

Projects

- **Court Case Timeline Extraction: GitHub** Oct '25 – Dec '25
  - Built an **NLP-powered web application** to automatically extract **chronological timelines** from court judgment PDFs, reducing manual document analysis effort by **~70%.**
  - Applied **Named Entity Recognition (NER)** with custom rule-based filtering to accurately extract **dates, persons, and legal events** from **multi-page, noisy legal text** with inconsistent formatting.
  - Designed an **interactive Streamlit interface** and implemented **post-processing pipelines** to generate clean, **structured JSON/CSV outputs** suitable for downstream analysis and automation.
  - **Tech**: Python, Streamlit, spaCy, pdfplumber, dateparser, pandas.
- **CPU Scheduler Simulator: GitHub** Feb '25 – Apr '25
  - Developed a **CPU scheduling simulator** implementing **FCFS, SJF, and Round Robin** algorithms with configurable process and time-quantum inputs.
  - Simulated execution of **10–50 processes**, computing **waiting time and turnaround time** to compare algorithm performance.
  - Built a **web-based GUI** to visualize scheduling behavior and highlight **OS-level scheduling trade-offs**.
  - **Tech**: JavaScript, HTML, CSS (front-end), algorithmic logic in JS.

Training

- Data Structure and Algorithm using Java by CipherSchools - Link Jul '25 – Aug '25
  - Completed a structured training program covering **core data structures and algorithms**, including arrays, linked lists, stacks, queues, trees, sorting, and searching techniques.
  - Implemented and practiced these concepts through **hands-on coding exercises and assignments**, strengthening problem-solving and algorithmic thinking.
  - Analyzed solutions using **time and space complexity**, improving efficiency-aware coding and optimization skills.

Certificates

- Cloud Computing by NPTEL- Link Apr '25
- Coursera: Fundamentals of Network Communication - Link, Nov '24
- Coursera: Introduction to Hardware and Operating Systems, Digital Systems - Link Nov '24
- Data Structure and Algorithm using C++ by CipherSchools - Link Jul '24

Education

- Lovely Professional University Punjab, India
  Bachelor of Technology – Computer Science and Engineering; ***CGPA: 7.0*** Aug '23 – Present
- St. Xavier's Junior College Maharashtra, India
  Intermediate; ***Percentage: 60.50%*** Nov '20 – Apr '22
- R.A.U.B.S English High School Maharashtra, India
  Matriculation; ***Percentage: 76%*** Jun '18 – May '20
