Work Experience

Virtual Assistant (Freelancer) **Nov '25 - Dec '25**
Fiveral Private Limited

- Performed SEO optimization, including keyword research, on-page improvements, and competitor analysis using **Google Keyword Planner, Ahrefs, and SEMrush** to boost website rankings.
- Handled AEO (Answer Engine Optimization) by creating structured, search-friendly content aligned with voice search and AI-driven results, leveraging **schema markup tools and Google Search Console.**
- Conducted GEO (Geographical SEO) enhancements such as local keyword targeting, location-based content, and map listing optimization using **Google Business Profile and local SEO tools** to improve regional visibility.
- Monitored website performance and generated data-driven insights using **Google Analytics and Google Search Console** to track traffic, rankings, and optimization impact.

Projects

Court Case Timeline Extraction | *Python, Streamlit, spaCy, pdfplumber, dateparser, pandas.* **Oct '25– Dec '25**

- Built an **NLP-powered web application** to automatically extract **chronological timelines** from court judgment PDFs, reducing manual document analysis effort by **~70%.**
- Applied **Named Entity Recognition (NER)** with custom rule-based filtering to accurately extract **dates, persons, and legal events** from **multi-page, noisy legal text** with inconsistent formatting.
- Designed an **interactive Streamlit interface** and implemented **post-processing pipelines** to generate clean, **structured JSON/CSV outputs** suitable for downstream analysis and automation.
- GitHub Repository Link: **https://github.com**

Urban Traffic Pattern Identification | *Python, pandas, scikit-learn, Streamlit, data visuals lib.* **Oct '25 – Mar '25**

- Developed an **end-to-end ML pipeline** using **feature engineering, PCA, and DBSCAN clustering** to analyze **10k+ traffic records with 15+ features**, uncovering recurring traffic flow and congestion patterns.
- Reduced data dimensionality by **~40–50% using PCA** while preserving key variance, improving clustering efficiency and interpretability of traffic behavior.
- Built an **interactive Streamlit dashboard** to upload datasets and visualize **cluster distributions, congestion trends, and flow characteristics**, enabling faster exploratory analysis and insight generation.
- GitHub Repository Link: **https://github.com**

Certificates

Data Structure and Algorithm using C++ **Jul '25**
CipherSchools — Certificate Link

Cloud Computing **Apr '25**
NPTEL — Certificate Link

Technical Skills

Languages C++, Java, JavaScript, C, Python

Technologies/Frameworks: HTML and CSS

Skills: Data Structures and Algorithms, Problem-Solving, Responsive Web Design

Education

Lovely Professional University Punjab **Punjab, India**
Computer Science and Engineering — CGPA: 7.0 *Aug '23 - Present*

St. Xavier's Junior College **Maharashtra, India**
12th with Science — Percentage: 60.50% *Nov '20 – Apr '22*

R.A.U.B.S English High School **Maharashtra, India**
10th with Science — Percentage: 76% *Jun '18 – May '20*
